

Commercial *weather-based landscape irrigation controller specifications*

Communication Method: Daily watering changes are affected by temperature sensor modifying a seasonal curve for each local.

Support: Free technical support at 877-922-2782 or on our website at www.aquaconserve.com

Warranty: 36-month warranty; extended warranty none

Installation: Authorized/Certified professional:
Chris Danton – 510-938-6655

Signal Fee: None

Programming: Programming guide is included for installer. Further help is available on our website or toll free number.

Maintenance: None

Programming Flexibility: There are 4 programs and 4 start times per program. You may water any day or days of the week, skip up to 5 days between watering, water on even days or odd days or turn the controller off. You may add or subtract watering without affecting the primary schedule. You can view the amount of watering that has occurred today or the last 7 days. The controller will stop watering when it rains once the rain sensor is installed.

AQUA Conserve, Inc

"Saving Water through Technology"

Now you can have a commercial quality irrigation controller in your very own home and receive the same water savings and peace of mind experienced by leading landscape maintenance contractors.

Aqua Conserve controllers have been installed and are saving water in cities, schools, private homes and commercial sites throughout the west. With seven models and twenty-four sizes available, Aqua Conserve offers the widest range of weather-based controllers in the industry. All controllers feature:

Ease of Programming

Aqua Conserve's controllers can be programmed by the average homeowner in a few minutes using the simple, illustrated instruction guide.

Stand-Alone Operation

Aqua Conserve's controllers do not require off-site transmission of signals nor accompanying fees.

Micro-Climate Adaptability

Programming like a conventional controller gives Aqua Conserve the flexibility to match local water needs.

No Monthly Fees...Ever!

Weather data is stored in the controller and a sensor is included to monitor daily changes.

Affordable

Aqua Conserve controllers cost no more than any major brand commercial controller. And, there's a payback on savings.

On-Line Water Scheduling Help

Visit our web site and we'll help you set your watering times. Just click on "Watering Schedule"

**Outdoor Residential ET Controller
8 & 12 Stations**

**Outdoor Commercial ET Controllers &
Retrofit Panels**

For Even More Savings **Add a Rain Sensor (shut-off)**

Get additional savings without visiting your controller. By adding a Rain Sensor, your controller will automatically shut-off when it rains.

Mount the sensor within 25 feet of the controller in a location that will experience rainfall. Your controller will discontinue watering during measurable rain situations.

Order at the same time as your controller and we will credit the cost of the temperature sensor included with your controller.

**RTS-2
Wired Rain/Temperature Sensor**
