

# Intelli-Sense Series

## Commercial

### *Weather-based landscape irrigation controller specifications*

**Communication Method:** Intelli-Sense receives a weather update daily via one-way pager and automatically adjusts the irrigation schedule

**Support:** Toro has a toll-free technical support service, free of charge Monday through Friday, 7:00 a.m. to 5:00 p.m. PST (800) 664-4740

**Warranty:** The Toro Intelli-Sense Series is warranted from date of installation for a period of 5 years from a company you can count on

**Installation:** Provided by Toro certified contractors to ensure you achieve the maximum benefit of this technology

**Signal Fee:** The first 2 years of daily weather downloads are included in the initial price of the controller\*; you may choose to extend the service beyond 2 years as you see fit

**Programming:** Initial programming is completed by the Toro certified contractor at the time of installation; additional support can be found in the user manual or via Toro's technical support 800 number

**Maintenance:** None

**Programming Flexibility:** The Intelli-Sense controller incorporates WeatherTRAK®-enabled software to automatically calculate irrigation schedules based on answers to a series of self-prompting questions, eliminating any guesswork.

\*Excludes 24-station model.

Model No.	Description	List Price	Local Tax	S & H	Subtotal	Rebate Amount	Total
TIS-06-ID	6-station Indoor Intelli-Sense Controller	\$619.00	8.25%	N/A	\$670.07		
TIS-09-ID	9-station Indoor Intelli-Sense Controller	\$659.00	8.25%	N/A	\$713.37		
TIS-12-ID	12-station Indoor Intelli-Sense Controller	\$719.00	8.25%	N/A	\$778.32		
TIS-06-OD	6-station Outdoor Intelli-Sense Controller	\$659.00	8.25%	N/A	\$713.37		
TIS-09-OD	9-station Outdoor Intelli-Sense Controller	\$699.00	8.25%	N/A	\$756.67		
TIS-12-OD	12-station Outdoor Intelli-Sense Controller	\$759.00	8.25%	N/A	\$821.62		
TIS-24-OD	24-station Outdoor Intelli-Sense Controller (available Feb. 2006)	\$889.00	8.25%	N/A	\$962.34		

*Toro is simplifying home irrigation with the introduction of the Intelli-Sense Series controller. This controller series provides precise irrigation—it applies the right amount of water to your landscape day in and day out. It's smart—it follows daily weather patterns then calculates and adjusts watering times automatically. As a result, these technological advancements provide tremendous benefits:*

- **Saving water and the planet!**
- **Value**
- **Convenience**

**Saving Water and the planet**—Saving

water is no longer just a “good idea”; it is a need that is ever-growing. Fresh-water supplies are diminishing and the population is continuing to increase. We are challenged to do things differently to save for the future. Since an average of 60% of your monthly water bill is for outside water use, a great opportunity for savings is with your landscape irrigation. This is why we developed the Intelli-Sense Series controller. It irrigates precisely with little water waste. Such accuracy can reduce water use to 45–55%\* depending on local conditions and customer practices.

If you aren't over-irrigating, you won't have excessive runoff. Runoff is water that runs into streets, streams and the ocean. On a larger scale, this contributes to pollution and

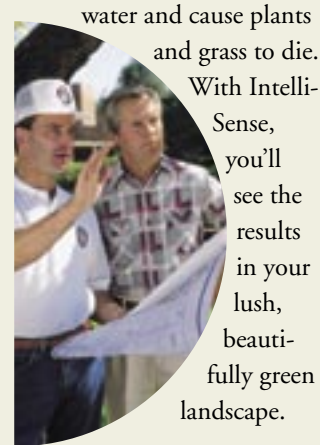

contamination in our environment. With the accuracy of Intelli-Sense, you can reduce urban runoff by as much as 70%. By watering precisely, most of the water is soaked into the landscape rather than creating excess runoff that

flows into the gutters and streets.

**Value**—Not only does Intelli-Sense work to preserve our environment, it will make your landscape look great, too. Some realtors say that your landscape is at least 10% of the value of your home. If this is the case, you will want to protect your investment.

Intelli-Sense irrigates effectively, thereby ensuring that your plant life will be healthiest. With this controller, you will not over water and create unwanted growth or under

water and cause plants and grass to die. With Intelli-Sense, you'll see the results in your lush, beautifully green landscape. For the price of one large cup of coffee per month, you can receive daily weather updates that will assure the right amount of water is applied to your landscape investment. Others may claim they incorporate historical weather data to provide bi-monthly updates, but this could be unreliable, especially since weather patterns are usually inconsistent.

**Convenience**—The Intelli-Sense controller takes the guesswork out of how much and how long to apply water by incorporating WeatherTRAK®-enabled programming functions.

WeatherTRAK programming allows you to select landscape attributes that best represent your yard. This develops a baseline watering schedule.

Then the Intelli-Sense controller receives daily weather updates and accordingly adjusts your irrigation schedule. This means you don't have to pull out your owner's manual to make changes every time the weather gets hotter or cooler. It's that easy!

Responsible water management is crucial—it is everyone's responsibility to protect and preserve this precious resource for today and tomorrow. State and local governments are now becoming involved to provide funding for rebate programs in order to help you update your current irrigation controller with this new technology. The Toro Intelli-Sense is one of many Toro irrigation products that help save water and the planet! Toro. Count on it.

*\*Savings were calculated on multi-year independent studies based on local conditions and individual watering habits.*
