

REDUCE YOUR WATER USE BY 15%

Together, we can help our community get through this drought emergency. All the drought information you need to know, including water efficiency rebates and resources, is available at ccwater.com/drought

WHAT WE'RE ASKING

- Reduce your water use by 15% compared to 2020
- Focus reductions on outdoor water use
- Report water waste at ccwater.com or by calling 925-688-8000

TRACK YOUR WATER USE

The average household uses 260 gallons of water per day. If those households save just 39 gallons per day, we can meet our 15% target!

Find your water use on your bill statement, online at ccwater.com/MyWaterReport, or by calling 925-688-8000.

THE FOLLOWING IS PROHIBITED

- Failure to repair a leak
- Causing excess water run-off
- Watering during and up to 48 hours after rainfall
- Watering between 9 a.m. and 5 p.m.
- Using a hose without a shutoff nozzle to wash a vehicle
- Washing hardscapes, such as driveways and sidewalks, unless failure to do so would create a hazard to health and safety
- Using potable water in a non-recirculating fountain

TIPS TO REDUCE YOUR USE BY 15%

Monitor your water use: Read your meter or install a smart home water monitor to determine your daily use and detect leaks. CCWD offers an instant rebate for Flume Smart Home Water Monitors.

Find and fix leaks: A leaking toilet can silently waste more than 100 gallons a day.

Reduce sprinkler use: reducing your automatic sprinkler schedule by one watering day can save hundreds of gallons per week.

Mulch around plants: using 2-3 inches of mulch in landscape areas can save 20-30 gallons each time you water your yard. Mulch reduces the amount of water that evaporates from your soil which means you'll be able to water less often.

Shorten your shower: Taking shorter showers saves 2 to 5 gallons per minute.
