Grove Way Phase 2 Work Scheduled to Begin

Contra Costa Water District soon will begin work on the second and final phase of its project to replace water service lines connected to a 6" water pipeline beneath Grove Way between Clayton Road and Cowell Road. The water service lines will be replaced and transferred to a parallel 12" water pipeline also beneath Grove Way. This phase of work also includes replacement of approximately 260 feet of water pipeline beneath Roslyn Drive. A portion of your payments for water service are used for high-quality and long-lasting system upgrades, like pipeline replacements, which avoid future costly breaks and service interruptions to the pipes that deliver water to your home. Following this phase, the remaining section of 6" pipeline will be isolated and removed from service. Please see the other side of this notice for a list of services to be relocated.

Work Schedule

Work will be completed in two phases.

Phase 1: Completed in early 2022

Phase 2: Monday, June 6, through November 30, 2022

Work hours: 8:00 a.m. through 5:00 p.m. Monday through Friday

(Night/weekend work is not planned, but may become necessary to keep on schedule.)

What to Expect

Crews will create an open trench to relocate water service lines beneath the street and install a new water pipe beneath Roslyn Drive. As work progresses, traffic patterns may shift, and parking restrictions may become necessary. At the end of each shift, trenches will be covered, and the site will be cleaned. The trench area will be repaved at the end of the project. While work is underway, you should expect an increase in construction-related traffic and noise. When the project is complete, the trench and any disturbed landscaping will be restored to pre-construction conditions. To view slides from a community meeting that was held Dec. 21, 2021, visit ccwater.com/projects, navigate to the Grove Way Service Line Replacements Project and click Project Notice.

Temporary Water Outage

Brief temporary water outages are necessary to complete this project. An outage of less than 30 minutes will occur on the day of your service line replacement. If your property will be subject to a planned temporary water outage, a crew member will notify you in person on the day of the outage. A separate extended outage lasting up to eight hours will be necessary to connect the new water pipe beneath Roslyn Drive to the existing system. Customers affected by this outage will receive notice via door hanger approximately 48 hours in advance.

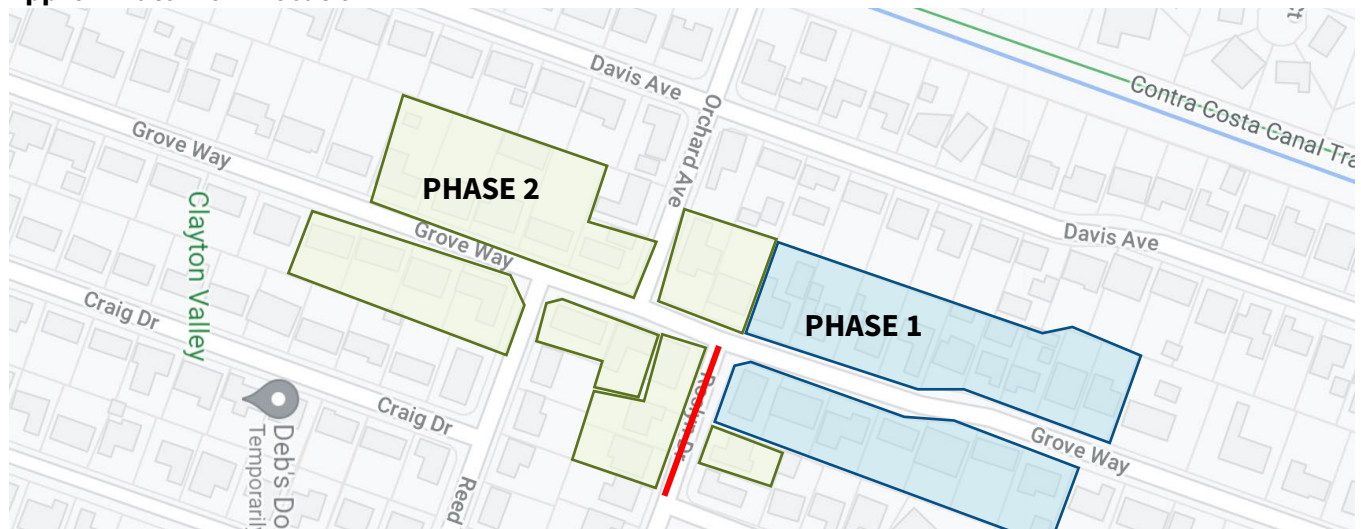

Water flushing

To complete construction, District crews must flush water from the system. This flushing ensures integrity of the new pipes as well as safe, clean water to your tap. We use best management practices to ensure activities are safe for the environment and only flush as much water as is required. Water will be diverted directly into a nearby storm drain. Unfortunately, it is not possible to capture this water for other purposes. Drainage path will be identified and evaluated prior to flushing and physical barriers like sandbags will be placed where necessary to prevent water flowing into private property.

Contact

We appreciate your patience and understanding while we upgrade your neighborhood’s water infrastructure. If you have any questions, please contact Oliver Symonds at osymonds@ccwater.com or 925-688-8010. For urgent matters after normal business hours, please call 925-688-8374.
