Contra Costa Water District utilizes myCOI to track and verify Vendor's insurance coverage, so that Vendor do not have to spend time requesting, collecting or delivering a Certificate of Insurance (COI) to Contra Costa Water District. Upon Contra Costa Water District's receipt of this executed Agreement and approval as a vendor, Vendor will receive an email from registration@mycoitracking.com. Vendor must follow the instructions contained in the email and complete the online registration. Upon completion of registration, myCOI will request proof of insurance directly from Vendor's insurance agent(s). In addition to other terms and conditions contained herein, Vendor shall not commence work and no payments shall be made to Vendor, unless Vendor is registered with myCOI and a compliant COI has been received.

Chemical and Physical Properties:

The Contractor must furnish Hydrofluosilicic Acid (23%) in accordance with the current version of the American Water Works Association's Standard B703-1.1 for Hydrofluosilicic Acid, except as modified or supplemental herein. NSF 60 certification for the chemical works of origin for this product is required at submission of bid. The Bill of lading must clearly identify the product delivered to be NSF 60 certified by stamp or type written statement – no handwritten notations will be accepted. Failure to provide clear identification of NSF product will result in rejection of the load at no cost to the BACC Agency.

Delivery Requirements

Placement of Orders

Contractor must be capable of making deliveries within (3) three working days after receipt of order. Conditions may arise which require emergency deliveries (including holidays, weekends, and night hours) within twenty-four (24) hours after notification.

With the exception of emergency deliveries, all deliveries shall be made weekdays between the hours of 7:00 am to 2:00 pm. The Water Treatment Supervisor (or a designated representative) must approve any exception to this requirement prior to the delivery.

Bidders shall submit with their bid a letter from their supplier(s) stating they will maintain a supply of hydrofluosilicic acid to guarantee that the bidder can meet the District's needs.

Safety Requirements

The truck driver/delivery technician shall provide and wear the necessary personal protection equipment as specified on the Safety Data Sheets (SDS) for the product being delivered. Truck driver/delivery technician must provide and use wheel chocks while off-loading product. The contractor, their employees, subcontractors, and/or agents must conform to the rules and regulations pertaining to safety established by the California Division of Industrial Safety, and they must adhere to all State, Federal, and Occupational Safety and Health (OSHA) safety standards while on the premises. Furnished equipment, materials, and/or services, must comply with all OSHA standards and regulations, and all applicable government laws and orders. We reserve the right to refuse any shipment which cannot be unloaded using safe and proper technique. Any such refusal will result in the return of the product at the contractor's sole expense.

Spillage

The Contractor shall be responsible for any spills resulting from the failure of its or its sub-contractor's delivery equipment or from failure of attendant delivery personnel in the proper performance of their duties. Proper performance shall require attendant delivery personnel's constant inspection and observation of unloading operations and knowledgeable response to problems or emergencies that would most commonly

be expected to occur. This District reserves the right to refuse any and all deliveries made with equipment which is poorly maintained.

The Contractor shall observe the entire filling operation at each water treatment plant and shall immediately report any spills caused during the filling operations to the on-duty Plant Operator. The Contractor will be responsible at no charge to the District for immediate clean-up, containment, disposal, and the restoration of the affected area back to original condition prior to the incident. These activities will be conducted in accordance with all applicable laws and regulations. If the spill is not cleaned up, the District will hire a certified hazardous material handling company to clean up the spill and properly dispose of material, and the cost for such service and any fines or penalties which may be imposed by regulating agencies will be charged to Contractor and deducted from amounts due to the Contractor.

Condition of Cargo Containers and Equipment

The tanks or trailers shall be clean and free of residue from previous loads which might contaminate the product. It is the Contractor's responsibility to verify the cleanliness of the transporting equipment before loading. All appurtenant valves, pumps, and discharge hoses used for the delivery of hydrofluosilicic acid shall be clean and free from contaminating material. The District may reject a load if the equipment is not properly clean. The Contractor shall furnish a District-approved, leak-free connection device between his pumper and the District's intake receptacle.

The District requires the Contractor to provide all off-load connectors. The off-load connectors are 2" (two inch) camlocks at all treatment plants. Contractors must provide and use wheel chocks when unloading product.

A split load shall be defined as a full truckload that is divided in any combination of pounds/gallons between two water treatment plants. Split loads between Bollman (Concord) and Randall Bold or Brentwood (Oakley) require a certified weighmaster certificate between each water treatment plant delivery. The load must be reweighed between the Oakley and Concord facilities. Costs associated with the second weight slip are the responsibility of the vendor not CCWD. A split load between the two Oakley water treatment plants (Randall-Bold and Brentwood) does not require a weight slip. Split loads also require that each plant be invoices separately. Any additional costs incurred for these loads must be identified and submitted at the time of the bid proposal.

Sampling and Testing

At the sole option of the District, the Contractor's delivery personnel (driver) may be asked to collect a sample of hydrofluosilicic acid before the shipment is unloaded. In this case, the District will supply the sample container and the driver shall collect the sample from the tank truck and turn it over to the District. The sample shall be considered representative of the lot.

The District reserves the right to subject samples of the hydrofluosilicic acid to analysis to ensure that it meets these specifications. If the hydrofluosilicic acid does not meet specifications, the District has the option of requiring the Contractor to remove and replace any and all rejected hydrofluosilicic acid within 24 hours of notification. No payment shall be made for hydrofluosilicic acid that is rejected.

Any lot tested by the District that fails to comply with the specifications shall constitute grounds for rejection of that lot. Repeat failures to comply with the specifications shall constitute grounds for cancellation of the contract.

Rejection of Deliveries

The District reserves the right to reject any delivery which does not conform to these specifications or which has been contaminated and must be re-delivered by the Contractor within 48 hours of the unacceptable delivery. Any departure from bid specifications must have prior approval by Contra Costa Water District in writing. The rejection includes reimbursement of the District by the Supplier, or replacement free of charge, of any bulk delivery so rejected.
